

ESG Supplier Intelligence powered by givvable

VendorPanel has partnered with givvable, an award-winning platform that uses AI to validate supplier sustainability credentials. This integrated solution enables buyers to purchase goods and services from suppliers with strong ESG credentials.

What is ESG Supplier Intelligence?

VendorPanel ESG Supplier Intelligence is a mechanism that enables buyers to easily find and engage with suppliers that meet specific ESG requirements. Real-time augmented supplier data enables better decision making at the point of purchasing goods and services, driving positive sustainability and economic outcomes.

Who is givvable?

givvable is a multi-award-winning platform that uses powerful AI and data models to automate supplier sustainability diligence and process the categorisation of over 1,500 supplier credentials into six key ESG themes.

It is used by Sustainability, Procurement & Compliance professionals to track verified credentials and improve supplier performance. givvable provides users with the data they need to evaluate supplier performance beyond traditional metrics and identify opportunities to improve their social and environmental impacts.

What ESG credentials will be available in Go to Market?

givvable has created sophisticated data models that map over 1,500 supplier credentials to six overarching ESG themes:

Community

Social

Ethical

Diversity

Environmental

Governance

Users of VendorPanel's Go to Market module can filter and select suppliers that have validated credentials under these six key themes.

More detailed information on supplier sustainability is available through the premium givvable upgrade.

Six ESG themes (from over 1,500 supplier credentials)

Community

A commitment to sustainable development, social responsibility and supporting the community to minimise negative impacts.

Ethical

Processes to demonstrate that products sourced are obtained in a responsible and sustainable way and workers are safe and treated fairly.

Environmental

Demonstrating responsible interaction with the environment, including carbon neutral, zero waste and circular economy.

Social

A defined primary social, environmental or community purpose. Includes registered charities, not-for-profits and social enterprises.

Diversity

Diverse or inclusive by ownership or employment of under-represented or disadvantaged groups demonstrated by credentials or verification.

Governance

Policies and procedures demonstrating the organisation operates with accountability, integrity and equality in its practices.

Benefits to users

As givvable uses powerful AI and data models to continuously identify and map sustainability and ESG datasets, our integrated solution ensures supplier sustainability information is:

- **Reliable.** The data is continuously refreshed, delivering accurate sustainability information on suppliers
- **Comprehensive.** Data is gathered from all public sources to provide a full sustainability profile
- **Impactful.** Enabling easy identification has been proven to increase engagement with ESG suppliers
- **Reportable.** The integrated solution allows organisations to accurately show the number of suppliers with ESG credentials being invited to quote and successfully winning opportunities

What do clients get when they upgrade to the premium package?

The upgraded dataset shows which verified entity issued the credential. This enables buyers to identify suppliers that have specific credentials that they value.

For a more detailed overview of the premium package, plus pricing and inclusions please reach out to your Account Manager.

There are freemium (no additional cost to users) and premium packages (pricing on request) available for Go to Market users.
